- After all adjustments are completed, press button S4 to exit setting mode.

Remark:

1. Lower limit of safety range can be set from 30 to 239 (b.p.m.).
2. Upper limit of safety range can be set from 40 to 249 (b.p.m.).
3. The minimum interval between upper limit and lower limit of the safety range is 10 units. If the interval is less than 10 units, then the adjustments will be changed automatically.
4. If warning sound is turned on, the watch will beep when heart rate is beyond the limits.
5. Age can be set from 1 to 99.
6. If “level -” is selected, user can set his own safety range and equated safety range is provided for “level 1” to “level 4”.
7. If there is no button operation for 2-3 minutes in setting mode, the watch will return back to Safety Range Set mode automatically.
8. Press button S2 to toggle between the displays of “Age” and “Safety Range”.
9. By entering setting mode in “Age” display, the setting sequence will be Sound “Sd” on/off, Age, Level “LL”, Lower Limit “LO” and Upper Limit “HI”.

(2) Equipping the transmitter

- Wet the grooved electrode areas of the transmitter with water.
- Attach the transmitter to the elastic strap provided.
- Secure the transmitter on your chest, below the chest muscle, with the grooved electrode areas against your skin. Check that the logo is in a central upright position.

Remark:

1. Transmitter electrodes should be moisten to ensure flawless heart rate measurement.
2. It is recommended that you wear the transmitter against your bare skin to ensure flawless operation.

(3) Activating the heart rate measuring function of the watch

- In Normal Time, Chronograph or Timer mode press button S4 to enter Heart Rate Monitor mode, “Hr” displayed in the bracket.
- The watch will then responses to the signal emitted by the transmitter and display the current heart rate (b.p.m.) in the upper row of the display, next to the bracket.

Remark:

1. The heart symbol flashes when signal is received.
2. The transmission range between the watch and the transmitter is 3 feet/1 meter.
3. Entering the Heart Rate Monitor mode in Normal Time mode will enable you to use heart rate measurement together with normal timing. Heart rate is displayed in the upper row and normal time is displayed in the lower row.
4. Entering the Heart Rate Monitor mode in Chronograph mode will enable you to use heart rate measurement together with the chronograph. Heart rate is displayed in the upper row and chronograph is displayed in the lower row.
5. Entering the Heart Rate Monitor mode in Timer mode will enable you to use heart rate measurement together with the count down timers. Heart rate is displayed in the upper row and count down time is displayed in the lower row.
6. An arrow pointing up or down will be displayed next to the heart rate reading to indicate that the current heart rate is above the upper limit or below the lower limit of the safety range respectively. And warning sound will also be given if “Sd” is in “on” state.
7. To exit Heart Rate Monitor mode, press button S4 or if no signal is received for 2-3 minutes, the watch will exit automatically.

(J) HOW TO RESET THE WATCH

In any mode, press & hold all buttons at the same time for 2-3 seconds, the display will be turned off, release the buttons and the display will be turned on again, with the watch reset to AM 12:00 00 Sun 1st Jan.

Remark:

The daily alarm and hourly chime is reset to “off” state.

(K) BATTERY REPLACEMENT
